

ROOF MAINTENANCE.CA

Toronto Flat Roofing Contractor Dedicated to Building Perfect Commercial & Industrial Flat Roofs

Cheap flat roof replacement solutions always sound like a good bargain, but many of these jobs end up leaving the flat roof in a worsened state. The best flat roofing companies in Toronto do not sacrifice the quality of a flat roof installation for cost. The best way to fix a flat roof is to have it serviced by an experienced flat roof specialist.

Partial flat roof replacements, patch-ups and flat roof recoveries become difficult to justify if the damage and deterioration leading to the need for service is due to aging, weathering and long-term exposure to the elements. If the deterioration is extensive, general patch-ups and flat roof repairs will

rarely solve the problem. For example, replacing deteriorated base flashings or pitch pockets may temporarily eliminate a specific source of water intrusion, but continued patch-ups of individual components will rarely be cost-effective.

At RoofMaintenance.ca we provide you with free consultation and detailed written estimates suited for your **flat roof replacement** projects. We install durable and cost effective flat roofing systems backed with a leak-free warranty.

Visit www.roofmaintenance.ca to request a free, no-obligation estimate for your next flat roofing project.
